Vol. 76 COORDINATION CHEMISTRY REVIEWS February 1987

CONTENTS

Some reactions of ruthenium cluster carbonyls under mild conditions
M.I. Bruce (Adelaide, South Australia, Australia) 1

The chemistry of copper and silver in their higher oxidation states
W. Levason and M.D. Spicer (Southampton, Gt. Britain) 45

Thiolato-complexes of the transition metals
P.J. Blower (Brighton, Gt. Britain) and J.R. Dilworth (Colchester, Gt. Britain) 121

The transition metal coordination chemistry of anion radicals
W. Kaim (Frankfurt am Maim, F.R.G.) 187

Structural and spectroscopic properties of metal–urea complexes
T. Theophanides and P.D. Harvey (Montréal, Qué., Canada) 237

Author index 265

Subject index 265

SOME PAPERS TO APPEAR IN FORTHCOMING ISSUES

The variable coordination chemistry of a potentially heptadentate ligand with a series of 3*d* transition metal ions. The chemistry and structures of $[M(py_3tren)]^{2+}$, where M(II) = Mn, Fe, Co, Ni, Cu, and Zn and $(py_3tren) = N\{CH_2CH_2N{=}C(H)(C_5H_4N)\}_3$
R.M. Kirchner (Bronx, NY, U.S.A.), C. Mealli (Firenze, Italy), L.C. Andrews, N.J. Rose, E.C. Lingafelter (Seattle, WA, U.S.A.), M. Bailey (Mt. Pleasant, MI, U.S.A.), N. Howe (Everett, WA, U.S.A.), L.P. Torre (Rahway, NJ, U.S.A.) and L.J. Wilson (Houston, TX, U.S.A.)

Structure and reactivity of the metal-centered transition metal excited states
J.F. Endicott, T. Ramasami, R. Tamilarasan, R.B. Lessard, C.K. Ryu (Detroit, MI, U.S.A.) and G.R. Brubaker (Chicago, IL, U.S.A.)

Synthesis, structure and electrochemical characterization of homo- and hetero-dinuclear copper complexes with compartmental ligands
P. Zanello (Siena, Italy), S. Tamburini, P.A. Vigato (Padova, Italy) and G.A. Mazzocchin (Venezia, Italy)

Analysis of structural data of technetium compounds
M. Melník (Bratislava, Czechoslovakia) and J.E. van Lier (Sherbrooke, Qué., Canada)
